McAfee ePolicy Orchestrator
The world's most complete management software just got better

Unify the way you manage endpoints, networks, data, and compliance solutions with McAfee® ePolicy Orchestrator® (McAfee ePO™) software, the foundation of the McAfee Security Management solution. More than 30,000 customers use McAfee ePO software on nearly 60 million nodes to manage security, streamline and automate compliance processes, and increase overall visibility across security management activities. With its scalable architecture, fast time to deployment, and optimization for enterprise systems, McAfee ePO software is the most advanced security management software available.

Today, more than ever, IT organizations are taking a strategic approach to security—consolidating security portfolios to reduce complexity, investing in next-generation technologies to improve protection, and integrating with existing IT assets to streamline processes. McAfee ePO software enables tens of thousands of customers to centrally manage security, achieving dramatic efficiencies.

Extensible Workflows Streamline Security and Compliance Processes
With McAfee ePO software, IT administrators can unify security management across endpoints, networks, data, and compliance solutions from McAfee and third-party solutions. McAfee ePO software provides flexible, automated management capabilities so you identify, manage, and respond to security issues and threats. You define how McAfee ePO software should direct alerts and security responses based on the type and criticality of security events in your environment, as well as create automated workflows between your security and IT operations systems to quickly remediate outstanding issues. As a result, you save time and money—with a more effective security program. McAfee ePO software helps drive down the cost and complexity of managing security.

A Revolutionary Architecture
Real Time for McAfee ePO is the first security control system that lets you instantly find any information about any computer, deploy products, or update configurations in the environment in a matter of seconds. In large or complex environments, this is literally hundreds to thousands of times faster than traditional solutions.

Real Time for McAfee ePO delivers:
• Instant information on the state of computing assets in seconds, not hours or days
• Increased protection through policy enforcement to ensure that antivirus, encryption, and other crucial services are always installed, running, and up to date
• Cross-referenced threat information with a large, continuously monitored peer-to-peer network
• Acceleration to antivirus, data-loss protection, host-based intrusion prevention, whitelisting, web filtering, firewall, encryption, and other security products offering increasing scalability and reduced management timeframes

Connect Security to Your Business with McAfee ePO Software
Centrally manage enterprise security
• Open framework unifies security management for systems, applications, networks, data, and compliance solutions
• Extensible platform integrates with and leverages your existing IT infrastructure

Take action with confidence
• Get the comprehensive views and insight you need, when you need it, to proactively address security issues—both internal and external
• Shorten time from insight to response through actionable dashboards with advanced queries and reports
• Identify unknown assets on your network and bring them under control with rogue system detection

All This with the Power of Real Time for McAfee ePO
With existing security management toolsets, complex infrastructures with hundreds of servers, and thousands of endpoints, you can’t afford to wait hours or days to collect endpoint data and then days or weeks more to remediate through traditional policy enforcement tools. Real Time for McAfee ePO is the first and only solution that allows enterprises to query assets in seconds, identify potential issues, and mitigate risk in seconds rather than days. This groundbreaking technology dramatically reduces exposure risk and cost of security events, outages, breach potential, and damage to reputation.
Connect Security to Your Business
with McAfee ePO Software (continued)

Reduce complexity and streamline processes
- Guided configuration, automated work stream, and predefined dashboards make getting started a snap
- Tag-based policy assignment precisely targets assignment of predefined security profiles to systems based on their business role or at-risk status
- Task catalog and automated management capabilities streamline administrative processes and reduce overhead
- A single web interface aligns security processes for maximum visibility while a single agent reduces the risk of endpoint conflicts

Scale for enterprise deployments
- Enterprise-class architecture supports hundreds of thousands of devices on a single server
- Supports complex and heterogeneous IT environments
- Enterprise reporting across premises and Security-as-a-Service (SaaS) security information

Customers Demand Performance, and McAfee ePO Responds with New Features and Benefits

<table>
<thead>
<tr>
<th>New Feature</th>
<th>Benefit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Real Time for McAfee ePO</td>
<td>Responds to security queries up to 1,000 times faster</td>
</tr>
<tr>
<td>Enhanced disaster recovery</td>
<td>Recover your McAfee ePO server and settings quickly and efficiently</td>
</tr>
<tr>
<td>Native 64-bit support with reporting orientation</td>
<td>Improved performance</td>
</tr>
<tr>
<td>Policy comparison common task orientation</td>
<td>Improved usability and navigation</td>
